

Cleanliness is critical for every surface in your facility... including your floors. In fact, clean floors were identified as a top factor when it comes to a positive facility experience.

Reliable Brand® floor and hand pads create a polished appearance that satisfies your customers and employees while meeting your needs for performance, cost control and even

sustainability. They extend the life of the floor, and provide the means for easier and faster cleaning.

Choose from four different types of floor pads—stripping, scrubbing, buffing and polishing, or burnishing—plus a variety of light to heavy duty hand pads and sponges.

We use 100% recycled fiber

With Reliable Brand floor pads, our customers don't have to sacrifice quality or product performance to support your sustainable position. The majority of our floor pads use 100% recycled fiber in their production and prevent used water and soda bottles from going into the landfill.

Full Cycle® Advantage

- Made from 100% recycled PET plastic
- Specially formulated to biodegrade in a fraction of the time that it takes conventional floor pads once discarded into an active landfill
- Leaves no toxins or toxic remnants in the environment
- Methane, a by product that occurs during the biodegradation process, can be captured and converted into energy where facilities exist

ASTM D5511 lab testing showed that up to 90% of the biodegradable material in Full Cycle® floor pad biodegraded in 14 months, as compared to less than 7% of our conventional pads. Such lab tests represent optimal conditions and often show faster results than actual landfill conditions. The actual rate of biodegradation of Full Cycle® pads and all other plastic materials in landfills will be slower and more variable, dependent upon actual landfill conditions. Test results do not imply that the product will decompose completely.

California Notice: California law prohibits the sale of plastic packaging and plastic products that are labeled with the terms 'biodegradable', 'degradable', or 'decomposable', or any form of those terms, or that imply in any way that the item will break down, biodegrade, or decompose in a landfill or other environment. These restrictions apply to all sales in or into the State of California, including such sales over the Internet.
