

HDPE can liners

- Made from quality, high density resin that creates strength with reduced resin thickness.
- Star seal bottoms evenly distribute load weight and prevent leakage.
- Perforated coreless rolls are designed for portability and quick dispensing.
- Suggested applications include paper, general refuse and non-sharp objects under moderate transport conditions.

LLDPE can liners

- Made from quality post-consumer/ industrial recycled resins.
- Perforated coreless rolls are designed for portability and quick dispensing.
- Everyday use liner suitable for most applications and great for heavy, irregular waste.

LLDPE high performance can liners

- Made from high quality LLDPE resin which creates exceptional strength, puncture and tear resistance with a thinner bag than standard Butene resin.
- Star seal bottoms evenly distribute load weight and prevent leakage.
- Perforated coreless rolls are designed for portability and quick dispensing.
- Suggested applications include sharper objects and irregular waste with heavier transport needs.
